### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Crittenden on 02/15/2006.

The application has been amended as follows:

Claim 23, line 16, after "collapsed configuration" insert --wherein the hollow rod is operable to engage the rod distal end with the tubular actuator by compression of the tubular actuator between the rod distal end and the stop element so that wherein compression of the tubular actuator between the rod distal end and the stop element causes frictional engagement between the rod distal end and a tapered proximal end of the tubular actuator--.

Cancel claims 25 and 26.

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or suggest the compression of the tubular actuator between the rod distal end and the stop element causes frictional engagement between the rod distal end and a tapered proximal end of the tubular actuator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
